When the game is loaded, click the purple play button to start the game. The next screen you see is the level screen. Click the level you want to work with. This gem game has 100 free levels for you to solve! You can create three rows perpendicular to the column or horizontally in the row. Complete the level to exchange the two gems, simply click on the first gem and click on the gem to replace it. Only neighboring gems can be replaced. If you line up in three rows, those gems will disappear and the columns and columns will be filled with new gems from above. Also, swap is not allowed if it does not enter the three line. If you are really lucky and clever, you can sometimes form into 4 columns, or even 5 columns! The tip is a gem that shines for a short time on the board and can be used for 3 rows. To complete the level and advance to the next level, you need to earn enough points to move up the power bar on the left side of the game. Special gem power-ups you can get extra points if you make 4-in-line and better. So look for that opportunity whenever possible. Very often, you will see special gems that are extra powerful. Swap with these special gems and remove the entire line or group of gems at once with plenty of points. Keep an eye on them. If you are unlucky, you will run out of possible combinations before completing the level. In that case, the game will be over. Of You can play again if you wish.
